II. FUNDING

The Exceptional Child Program is funded by a combination of state, county, and federal monies. The State Exceptional Child Units provide the majority of the funds. During 1969-1970, of the 2,954 personnel, 2,530 were state Exceptional Child instruction units. The county school systems paid for an additional 197 units from local sources and 227 from federal funds.

III. SCREENING AND EVALUATION SERVICES

In addition to direct therapy services, public school speech therapists administered speech and language screening evaluations to 140,836 school age children, hearing screening tests to 71,443 children, and 9,038 children were provided speech improvement programs. Educational and psychological evaluations were provided for 28,395 children.

IV. GRADE LEVEL OF PROGRAM

The majority of the programs for exceptional children are at the elementary level, although within the last few years, programs have been expanding at the secondary level. Some growth is beginning at pre-school level.

V. ORGANIZATION PATTERNS

The Exceptional Child Program makes provisions for a variety of organizational patterns to serve these children's special instructional needs. Some children may receive their educational program in a self-contained full-time class; some may receive individual or small group instruction on a part-time basis in a resource room; others, weekly tutoring sessions from an itinerant instructor; and others, only an occasional consultation conference to check on special materials and equipment. An overview of the use of full-time and part-time classes is as follows:
